

Task 2

Write about the following topic:

Some people believe that it is best to accept a bad situation, such as an unsatisfactory job or shortage of money. Others argue that it is better to try and improve such situations.

Discuss both these views and give your own opinion.

Give reasons for your answer and include any relevant examples from your own knowledge or experience.

Write at least 250 words.

Everyone might encounter some negative situations in his or her life. When we are trapped in this dilemma, it is a tough choice for most of us to accept the reality or fight for improvements. Some people believe consider it is better to persuade ourself to compromise accept difficult realities in life, such as when we get a job that we are not fond of, accept it, as they say it is common in everyone's life. While others insist that we should do something and make the situation change strive to make changes. In my view, the latter opinion perspective is more positive and worth to try a better approach/mindset for life.

Although, for instance, it is very hard to get a satisfied job for most of us Those who believe in accepting difficult situations claim that it is unrealistic to expect a deeply satisfying occupation. This is largely due to the limitations in our an individual's educational background, the potential lack of working experience, and even the increasingly fierce competition from others, etc. All these factors makes contribute to reduce one's chances of finding promising work in a satisfying field. it so hard to get a promising work. Sometimes we might even fear if we don't take the present job For example, in China it is common for workers and recent graduates to accept low positions offered to them, as it is more difficult to get next one or another one we are not prefer to do either there is no guarantee they will be able to find another job. Even though the present position is not good enough a job may not bring great satisfaction, it provides us money the financial stability to afford daily life a decent standard of living and basic expenses.

Sometime accept the truth might be a good way to face real life Although accepting a position in life is an acknowledgment of reality, but it this is absolutely not the best one when there is something we can do to improve can be detrimental if a situation can be improved. Take the unsatisfied job as an example, we could find it

Comment [Dave1]: One sentence to state the topic: Some think... , while others... (this sentence isn't important, your introduction isn't important - write it quickly and then focus on your body paragraphs)

Comment [Dave2]: Introduction is too long. Try to just write 2 simple sentences so that you have more time to write your body paragraphs.

Comment [Dave3]: Clear opinion - great! Keep doing this - always choose a side - never sit in the middle - good!

Comment [Dave4]: Stating the topic

Comment [Dave5]: Claim / argue / feel / believe

Comment [Dave6]: Main idea - why do they feel this way?

Comment [Dave7]: A little weaker - weak claim - nuanced and complex - helps with task achievement and with your vocab and grammar

Comment [Dave8]: In general - so no 'the'

Comment [Dave9]: No our no we no you no your - too informal for academic writing

Comment [Dave10]: Develop it ok but it could be a little longer.

Comment [Dave11]: Use a specific example - real country, real person, real company and develop it fully. 4-5 sentences for your body paragraph.

Comment [Dave12]: Topic sentence to be short and simple. 10 - 15 words - simple, easy to understand and then you have more space to develop your ideas with a long specific example.

is possible to analyse the reasons-out-reasons why we can-not get-the-ideal-one-attain ideal situations in life, then analyze the standards or details and requirements of a more satisfactory change. ~~from the dreamed work.~~ The requirements of good job for job vacancies are posted online and give us potential applications a-a direction and target to aim for and guide their efforts at self-improvement. ~~or a target of what can be done or what level needs to be achieved.~~ At least, we could make solutions to overcome the unpleasant. It is then likely that an individual will be able to make at least modest improvements to their life.

Comment [Dave13]: Hypothetical example:
accounting - marketing -
certificates/degrees - start working on their
qualifications/study online - begin to apply
for positions.

As far as I am concerned, in extreme cases, when ~~things-a situation~~ can-not be changed, it is better to accept it and make yourself adaptations to it. But-However, when there is a hope to-for a change, never give up and try to do something different the individual should strive to improve their life.

Comment [Dave14]: Restate your opinion -
clear opinion - better if you can summarise
your ideas specifically.

Task achievement: 6 (not specific and developed enough)

Cohesion/Coherence: 6 (link better within your paragraphs between ideas and use more formal linking words)

Vocabulary: 6/7 (more academic collocations)

Grammar: 6 (good complexity but it needs to be more accurate)

Overall: 6
