

Task 2

Writing

WRITING TASK 2

You should spend about 40 minutes on this task.

Write about the following topic:

Some people say that the main environmental problem of our time is the loss of particular species of plants and animals. Others say that there are more important environmental problems.

Discuss both these views and give your own opinion.

Give reasons for your answer and include any relevant examples from your own knowledge or experience.

Write at least 250 words.

With the ~~development~~ increasingly rapid development of human society over the last few decades, numerous environmental problems have ~~become more pressing~~ seen in the past few decades. It is often argued ~~that whether or not~~ the extinction of ~~special a given~~ species, such as plants and animals, is the ~~most important~~ major environmental problem. I personally think that a more important environmental issue is global warming.

Concerned environmentalists argue that ~~the~~ The extinction of particular plants and animals can lead to ~~the searce~~ a scarcity of gene diversity. The expansion of agricultural ~~real field~~ and the over-hunting of animals in ~~the an~~ increasingly industrialized era ~~can has lead led~~ to the loss of the food and ~~inhabitants habitats of many~~ much wildlife depends on wildlife. Without adequate food and safe shelters, many ~~wildlife species~~ animals fail ~~struggle~~ to survive, which is the main ~~reason cause of the extinction of species~~ endangered and potentially extinct species. The ~~searce~~ scarcity of diverse species can have an adverse impact on gene diversity, which is likely to ~~destroy negatively impact the entire the ecology system~~ ecosystem. If ~~the habitats and species becoming increasingly vulnerable ecology system is ruined, it this will later~~ can pose a huge threat to human beings.

Concerned environmentalists argue that ~~the~~ The extinction of particular plants and animals can lead to ~~the searce~~ a scarcity of gene diversity. The ~~searce~~ scarcity of diverse species can have an adverse impact on gene diversity, which is likely to ~~destroy negatively impact the entire the~~

Comment [Dave1]: ok

Comment [Dave2]: the topic at the beginning of the sentence

Comment [Dave3]: what you want to say at the end of the sentence

Comment [Dave4]: this isn't argued

Comment [Dave5]: this is the topic - try to paraphrase the topic more accurately

Comment [Dave6]: don't get too obsessed with trying to change every word - it's not that important

Comment [Dave7]: clear opinion - good!

Comment [Dave8]: Never sit in the middle - always choose a side

Comment [Dave9]: A little long

Comment [Dave10]: Agree side

Comment [Dave11]: Excellent vocabulary! Great topic sentence - you have the main idea at the end of the sentence - what you want to say at the end - good!

Formatted: Font: Bold

Formatted: Font: Bold

Comment [Dave12]: Present perfect for a problem in the past - ongoing - unclear time

Comment [Dave13]: Don't really need

Comment [Dave14]: Don't need this

Comment [Dave15]: More nuanced - become

Comment [Dave16]: Cause - irrelevant to

Comment [Dave17]: All of this is mostly

Comment [Dave18]: Way too strong! Show

Comment [Dave19]: weak

Comment [Dave20]: ok development - how?

Comment [Dave21]: Agree side

Comment [Dave22]: Excellent vocabulary!

Comment [Dave23]: Way too strong! Show

Comment [Dave24]: weak

~~ecology system~~ecosystem. If ~~the habitats and species becoming increasingly vulnerable~~~~ecology system is ruined, it this will later~~can pose a huge threat to human beings. For example, in South America deforestation has greatly reduced the number of species and damaged the fragile links between animal life resulting in a decline in the number of exotic plants that can be used to treat various illnesses. It has been reported by researchers that this loss of biodiversity will have an adverse impact on medical advances for decades to come.

The ~~overwhelming trend~~increasing likelihood of ramifications from ~~of~~ global warming ~~has aroused worldwide attention~~has greater impact on the ~~environment overall~~. An increasing number of factories and cars ~~have seen~~have been produced over the past few decades. ~~Therefore, it~~This ~~overproduction~~ leads to ~~the increased~~emissions of green-house gases and air pollutants into the atmosphere. ~~Because of these~~Due to this concerning phenomenon, sea levels ~~s are~~increasing ~~es and as~~ the polar ice caps ~~melt~~icebergs melt, which may ~~make turn~~lands ~~turn~~into ocean and ~~the loss of human inhabitants~~adversely impact both human and animal life. Thus, global warming ~~has present~~sed a ~~unique~~challenge to human's life. If the ~~trend of~~global warming cannot be ~~alleviated~~mitigated and reversed, all of ~~us~~humanty will ~~have be~~at ~~the~~risk of dying out.

In conclusion, although the extinction of particular plants and animals can have a ~~damaging negative~~effect on human beings, I personally think that global warming is a more important environmental issue.

Task achievement: 5/6 Examples!

<https://howtodoielts.com/category/writing-task-2/sample-answers-writing-task-2/>

Cohesion/Coherence: 7 you link ok between sentences sometimes, good paragraphing, good referencing and linking words, some small mistakes

Vocabulary: 6/7 Ok accuracy, more good expressions/collocations
<https://howtodoielts.com/category/writing-task-1/academic/>

Grammar: 6 easy enough to understand but lots of small mistakes

Comment [Dave25]: ok development - how?

Comment [Dave26]: Fully developed answer
= really high task achievement and cohesion/coherence score

Comment [Dave27]: Specific, long example
- half of my paragraph is an example - real country - real results

Comment [Dave28]: Say why and then develop that idea

Comment [Dave29]: Links back to the sentence before - cohesion/coherence

Comment [Dave30]: Very specific - good!

Comment [Dave31]: Good linking back with the sentence before

Comment [Dave32]: State the result - good! Be more specific - how will this hurt? Coastal cities will have to migrate into areas with higher elevations - if it happens

Comment [Dave33]: Use more adjectives to bump up your vocabulary score

Comment [Dave34]: Not specific - too general - already said and it is obvious. For example, the majority of the Earth's population lives in cities and many of these are located along the coasts such as New York City and Shanghai. Even a moderate rise in sea levels will force millions to have to migrate to other parts of the country and a host of

Comment [Dave35]: Too strong a claim - not realistic

Comment [Dave36]: Try to include a more specific example

Comment [Dave37]: Too general

Comment [Dave38]: Clear opinion

Formatted: Font: Bold

Comment [Dave39]: Write an example and then check

Formatted: Font: Bold

Formatted: Font: Not Bold
